country's economy

Nº.2

aluminium rolling plant
in Europe
(in hot rolling capacity)

Nº.1

copper tubes
producer in Europe
(by volume)**

ElvalHalcor is a global industrial leader with advanced technology and 85 years' experience and expertise. Focused on sustainable operation and growth, ElvalHalcor offers aluminium and copper processing industrial products and solutions for dynamically growing markets.

ElvalHalcor is listed on the Athens Stock Exchange (ELHA).

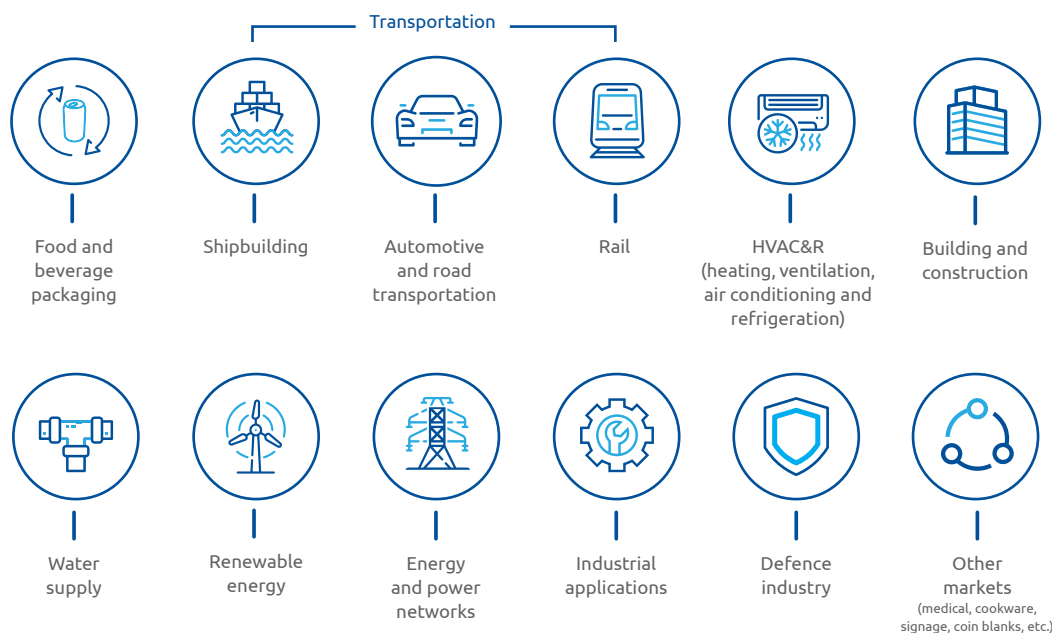

The company has an extended production base across 14 industrial plants with cutting-edge technology equipment. ElvalHalcor has a highly extrovert business model with solid presence in more than 90 countries by developing sustainable and high value-added products and solutions that meet the requirements of the most demanding customers.

ElvalHalcor prioritizes continuous investments in research and technology, ongoing care for its talented and highly specialized people, and nurtures a customer centric-philosophy.

ElvalHalcor is committed to sustainable growth, according to the principles of responsible production. The company's product solutions cater directly to megatrends, such as circular economy enabled by products with high recycled content, the transition to climate neutrality driven by e-mobility, sustainable urbanization reflected in energy efficient buildings, technological advancements and digitalization.

What we do

Our advanced aluminium and copper solutions, span the globe in over 90 countries, tailored for the most dynamically growing markets.

(*) excluding petroleum refinery products

(**) based on estimates by Cu2 Consulting (data regarding the volume of copper tubes production)

Leading European supplier of tailored, cutting-edge, flat-rolled aluminium solutions

Elval is the aluminium rolling division of ElvalHalcor, and one of the world's leading manufacturers in aluminium rolling and recycling. Elval has 50 years of rolling and recycling expertise, designing and manufacturing innovative aluminium solutions while building trusted partnerships across the globe.

The rolling plant located in Oinofyta Greece, distinguished for its state-of-the-art investments in equipment and technology, ranks as the 2nd largest aluminium rolling facility in Europe, in hot rolling capacity.

Having highly specialised human talent and operating an in-house Technology and Innovation Centre, enables Elval to develop an extensive custom-made product portfolio. The tailored solutions cater to the most contemporary industries, including packaging, transportation, automotive,

HVAC&R, building and construction, defence, energy and industrial markets. Elval has an unwavering commitment to Rolling Progress, responsible production, environmental protection and social responsibility. It collaborates with customers and key global sustainability organisations to enable the transition to climate neutrality and promote the contribution of aluminium to a circular economy.

Elval is dedicated to building an inclusive future, where diversity is celebrated, and every Elval Team individual feels valued and empowered to contribute to collective success.

Elval's production plant is certified according to ISO 9001:2015, ISO 14001:2015, ISO 45001:2018, IATF16949:2016, ISO 50001:2018, ISO 27001:2013, AS9100, ASI Performance Standard, ASI Chain of Custody Standard.

50 years' experience serving a global customer base

The most modern 4-stand tandem aluminium hot rolling mill

Reliable and dynamic aluminium solutions provider

State-of-the-art facilities and equipment

In-house technology and innovation centre

HALCOR

Evolving Beyond Copper

➤ www.halcor.com

No1 copper tubes producer in EMEA

Halcor is the copper and alloys extrusion division of ElvalHalcor. Halcor is the largest producer of copper tubes in Europe, the Middle East and Africa (EMEA). By implementing long-term investments, it supplies dynamically developing countries with a broad range of sustainable products and cutting-edge solutions.

With more than 80 years of experience in the metal processing industry, Halcor is a reliable partner for industries that manufacture equipment and fittings, as well as commercial companies that market products to meet the customers' needs all over the world.

A strong network of privately owned commercial subsidiaries throughout Europe and technical support

services allows Halcor to deliver customized solutions to the industry with flexibility and reliability.

Halcor specialises in developing solutions for a broad spectrum of applications, primarily for HVAC&R, industrial, electrical and construction applications, the automotive industry and for renewable energy sources.

Its commitment to being a leader in innovation is reflected both in its investment in Research & Development and in its advanced production processes.

Halcor's production plants are certified with the international standards ISO 9001:2015, ISO 14001:2015, ISO 45001:2018 and ISO 46001:2019.

80+ years' experience in copper processing

European market leader in copper tubes

State-of-the-art facilities and equipment

Copper tubes plant most efficient in Europe and biggest in EMEA region

Innovative Tube Heat Transfer Laboratory

Aluminium segment

Sustainable and high value-added flat rolled aluminium products and solutions for dynamic markets:

- Packaging (food and beverages)
- Sea, road and rail transportation
- HVAC&R
- Building and construction
- Defence
- Energy and power networks
- Renewable energy sources
- Industrial applications

✈ www.elval.com

✉ info@elval.com

Aluminium foil and aluminium-based packaging materials for the following applications:

- Flexible packaging for food, pharma and tobacco
- Semi-rigid food containers
- Cable wraps
- Tea lights
- Heat exchange equipment
- Technical applications
- Household use
- Hair care
- Li-ion batteries

✈ www.symetal.gr

✉ info@symetal.gr

A complete range of products in coated aluminium and solutions for building envelope applications:

- etalbond® aluminium composite panels for façades and digital printing
- Elval ENF™ solid coated aluminium sheets for façades
- orofe® pre-painted aluminium coils and sheets for roofing applications
- Ydoral® pre-painted aluminium for rain gutters
- agraphon® and arypon® functional coating systems
- Elval EZ™ false ceiling system
- Coated aluminium strips for flashings and rolling shutters

✈ www.elval-colour.com

✉ ecs@elval-colour.com

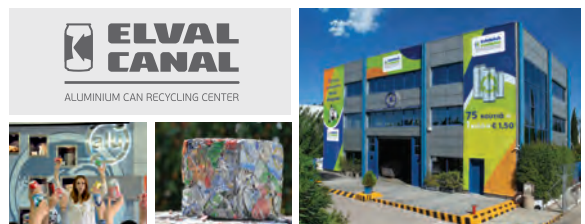

Aluminium rolling shutters, insect screens and vertical shading systems for housing and professional applications:

- Aluminium rolling shutters and aluminium boxes with and without polyurethane foam
- Pleated and classical insect screens for doors and windows
- Pergolas and vertical shading systems
- Octagonal galvanized axis and rolling shutter accessories
- Becker tubular motors and automations

Copper segment

HALCOR

Copper tubes with or without plastic coating or industrial insulation for:

- Water supply and heating networks
- Underfloor heating - cooling
- Air conditioning
- Heat pumps
- Refrigeration
- Solar energy and geothermy
- Natural and medical gas distribution networks
- Other architectural and industrial applications

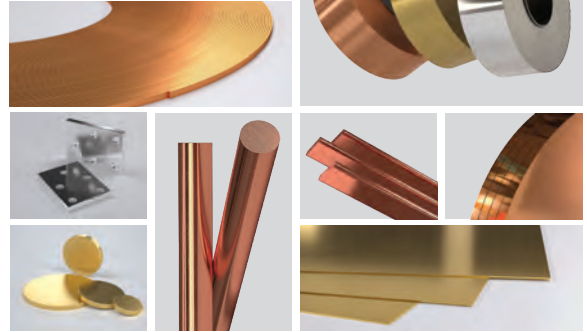

Extruded copper alloy products:

- Rods
- Tubes
- Sections
- Wires

✉ info@halcor.com

SOFIA MED

Rolled and extruded copper, copper alloys and high performance alloys, used in a diverse range of applications like, automotive, energy, industrial and construction:

- Sheets
- Strips
- HDT strips
- Plates
- Disks
- Rods
- Profiles
- Components
- Wires
- Bare and plated copper bus bars

Titanium zinc

EPIRUS METALWORKS

High quality coin blanks in a wide range of colours and material combinations:

- Monochrome coin blanks
- Outer rings for bi-colour coin blanks
- Inner blanks for bi-colour coin blanks
- Assembled bi-colour coin blanks
- Electroplated bi-colour coin blanks
- Circles for cymbals, boilers and decorative applications
- Cups for drawing processes
- Case cups and bullet cups
